* The European regulation No. 1169/2011 organizes the European rules in order to define and declare the ingredient list. Based on Article 18, the majority of food ingredient list is expressed as follows: "it shall include all the ingredients of the food, in descending order of weight, as recorded at the time of their use in the manufacture of the food". However based on the Annex VIII, pt4., (a) it is defined that "where foods have lost moisture following heat treatment or other treatment, the quantity shall be expressed as a percentage which shall correspond to the quantity of the ingredient(s) used, related to the finished product" corresponding to the column "% ingredients after cooking step".

Therefore, our packaging mentions percentage corresponding to the finished products, and not the use in the manufacture of the food (= % ingredients in the recipe). Only use in the manufacture can be expressed in total of 100%.
